UTEXTENSION
INSTITUTE OF AGRICULTURE
THE UNIVERSITY OF TENNESSEE

May 10, 2024

Number: 19

Trends for the Week Compared to a Week Ago

Slaughter Cows

Steady to \$2 higher

Slaughter Bulls

Steady to \$1 higher

Feeder Steers

Unevenly steady

Feeder Heifers

Unevenly steady

Feeder Cattle Index: 240.38

Fed Cattle

The 5-area live price on Thursday of \$185.25 was down \$1.17 compared to last week and \$295.00 dressed, up \$0.37.

Corn

July closed at \$4.69 a bushel, up 9 cents since last Friday.

Soybeans

July closed at \$12.19 a bushel, up 4 cents since last Friday.

Wheat

July closed at \$6.63 a bushel, up 41 cents since last Friday.

Cotton

July closed at 77.31 cents per lb, down 0.75 cents since last Friday.

Livestock Comments by Dr. Andrew P. Griffith

FED CATTLE: Fed cattle traded steady compared to last week on a live basis. Prices were largely \$184 to \$186 on a live basis and mostly \$295 on a dressed basis.

The 5-area weighted average prices thru Thursday were \$185.25 live, down \$1.17 compared to last week and \$295.00 dressed, up \$0.37 from a week ago. A year ago, prices were \$173.89 live and \$279.56 dressed.

Cattle trade was slow to develop this week as struggles in the beef complex continue. Packers are unwilling to pay higher prices as boxed beef prices continue to underwhelm while cattle feeders languish the idea of selling cattle cheaper due to high feeder cattle prices and an increasing corn price. The cattle feeder is being forced to holdout on selling finished cattle and bidding lower on feeder cattle as margins are squeezed and bleeding red ink. This tug of war is unlikely to end anytime soon as both packers and feedlots compete for any positive margin in the industry. One would think cattle feeders will gain leverage as the quantity of market ready cattle declines, but there are no guarantees in any environment.

BEEF CUTOUT: At midday Friday, the Choice cutout was \$294.20 down \$1.19 from Thursday and down \$0.72 from a week ago. The Select cutout was \$284.91 down \$0.85 from Thursday and down \$3.58 from last week. The Choice Select spread was \$9.29 compared to \$6.43 a week ago.

Memorial Day is two weeks down the road and largely thought of as the unofficial beginning of summer. The weekend or the two days prior to Memorial Day tend to be the start of the grilling season. For anyone who understands logistics, it is clear beef purchases for the start of the grilling season have already been made. For those who are not familiar with the

logistics of beef movement, it would be difficult for a packer to fill any order from a restaurant, grocery store, or any other food service entity in a two-week time period given a price must be negotiated, boxes filled, a truck loaded, travel time, a truck unloaded, and the meat placed on the counter. This is certainly an oversimplification of the process, but there is a lot to do to get beef from the packer to the final consumer. Simply think of the travel time. It is 1,600 miles from Liberal, Kansas to New York City. It would take 24 hours of drive time with no slowdowns to make such a trip. In trucker terms, this equates to two full days of driving and a couple extra hours the third day. The bottom line is do not expect beef prices to surge.

OUTLOOK: Based on weekly auction market averages, steer prices were unevenly steady compared to last week while heifer prices were also unevenly steady compared to the previous week. Slaughter cow prices were steady to \$1 higher compared to the previous week's weighted average price while bull prices were steady to \$2 higher compared to the previous week. Price trends for calves and feeder cattle varied by the auction and weight class this week. The overarching trend appears to be buyers having a stronger interest or preference towards heavier calves. Thus, many buyers are looking for 600 plus pound calves that can be marketed during the late summer and early fall time period, when prices tend to be highest for feeder cattle. This does not mean lighter weight cattle are not still in demand, because they are still in demand. It is the simple fact of buyers attempting to purchase animals that will hit a specific market based on the marketing time frame. Confusion and uncertainty remain evident in the futures market for most all time periods. As has been noted here and

(Continued on page 2)

Livestock Comments by Dr. Andrew Griffith

(Continued from page 1)

elsewhere, there is concern when it comes to consumer demand and the ability to push beef prices higher. If one thinks about this issue from a logical standpoint, if consumers cannot afford to purchase beef now or at slightly higher prices then what else can they not afford to purchase or pay for. The inability to purchase beef due to high prices will just be the beginning of consumer struggles as mortgages and car payments will be in question. Similarly, what about summer vacation? Are consumers trying to save a few extra dollars by eating lower priced products so they can pay for vacation? In the business world, this is a cash flow problem, which tends to be one of the first signs of financial stress. Consumers can do one of two things or both: spend less and/or work more to generate additional income. These decisions will influence beef prices, which in turn will influence the direction of cattle prices the remainder of the year.

ASK ANDREW, TN THINK TANK: What do cattle and Morgan Wallen have in common? They can both be unpredictable at times, and they are both as good as money in the bank. It seems most music artists want to have a collaboration with Morgan Wallen, which is similar to most farmers wishing they

had cattle in their enterprise mix this year due to high prices. I have never seen cattle throw a chair off a roof, but I have seen cattle throw troughs, fence posts, and people. One could imagine how expensive it would be to hire Morgan Wallen to do a show given his meteoric rise in country music, which is similar to cattle price escalation. However, if a person wants to pay to go to a Morgan Wallen show then it is much more reasonable than hiring him to do a private concert. This is likely the way many folks need to consider cattle herd expansion. It may not be wise to invest in rapid expansion of the cattle herd, but rather invest in a few this year and continue the trend the next several years in the instance cattle prices decline.

Please send questions and comments to agriff14@utk.edu or send a letter to Andrew P. Griffith, University of Tennessee, P.O. Box 160, 1000 Main Entrance Dr., Spring Hill, TN 37174.

FRIDAY'S FUTURES MARKET CLOSING PRICES: Friday's closing prices were as follows: Live/fed cattle –June \$176.15 +0.20; August \$174.13 +0.40; October \$177.43 +0.43; Feeder cattle –May \$238.80 +0.15; August \$250.90 -0.15; September \$251.98 -0.10; October \$252.88 -0.08; May corn closed at \$4.56 up 13 cents from Thursday.

Crop Comments by Dr. Aaron Smith

Overview

Corn, soybeans, and wheat were up; and cotton was down for the week.

On Friday the USDA released the May WASDE report. The May release provides the first WASDE estimates for the new crop.

U.S. corn production was projected at 14.86 billion bushels based on harvested area of 82.1 million acres and a national average yield of 181 bu/acre. Exports were projected to increase by 50 million bushels. Ending stocks for the 2024/25 marketing year were projected at 2.102 billion bushels, up 80 million bushels compared to the previous marketing year. Foreign corn stocks were projected down 111 million bushels compared to the previous marketing year. For the day, corn futures reacted positively, gaining 12 to 13 cents for the front three contracts.

U.S. soybean production was projected at 4.45 billion bushels based on harvested area of 85.6 million acres and a national average yield of 52 bu/acre. Both crushing and exports were projected to increase by 125 million bushels. Ending stocks for the 2024/25 marketing year were projected at 445 billion bushels, up 105 million bushels compared to the previous marketing year. Foreign soybean stocks were projected up 510 million bushels compared to the previous marketing year. For the day, soybean futures gained 7 to 10 cents for the front three contracts.

U.S. cotton production was projected at 16 million bales based on harvested area of 9.13 million acres and a national average yield of 842 lbs/acre. Exports were projected to increase by 0.7 million bales. Ending stocks for the 2024/25 marketing year were projected at 3.7 million bales, up 1.3 million bales compared to the previous marketing year. Foreign cotton stocks were projected up 1.23 million bales compared to the previous marketing year. For the day, cotton futures lost 1.01 to 1.33 cents for the front three contracts.

U.S. wheat production was projected at 1.858 billion bushels based on harvested area of 38 million acres and a national average yield of 48.9 bu/acre. Exports were projected to increase by 55 million bushels. Ending stocks for the 2024/25 marketing year were projected at 766 million bushels, up 78 million bushels compared to the previous marketing year. Foreign wheat

	Previous	Current	Change

(Continued on page 3)

Crop Comments by Dr. Aaron Smith

stocks were projected down 233 million bushels compared to the previous marketing year. For the day, Chicago wheat futures reacted positively gaining 23 to 26 cents for the front three contracts.

Corn

Across Tennessee, average corn basis (cash price-nearby futures price) strengthened or remained unchanged at West, North-west, West-Central, North-Central, and Mississippi River elevators and barge points. Overall, basis for the week ranged from 75 under to 8 over, with an average of 20 under the July futures at elevators and barge points. Ethanol production for the week ending May 3 was 0.965 million barrels per day, down 22,000 from the previous week. Ethanol stocks were 24.2 million barrels, down 1.288 million barrels compared to last week. Corn net sales reported by exporters for April 26-May 2 were net sales of 35 million bushels for the 2023/24 marketing year and 1.9 million bushels for the 2024/25 marketing year. Exports for the same period were down 11% compared to last week at 48.5 million bushels. Corn export sales and commitments were 89% of the USDA estimated total annual exports for the 2023/24 marketing year (September 1 to August 31) compared to the previous 5-year average of 96%. July 2024 corn futures closed at \$4.69, up 9 cents since last Friday. Jul/Sep and July/Dec future spreads were 11 and 23 cents. For the week July 2024 corn futures traded between \$4.54 and \$4.72.

Corn	Jul 24	Change	Dec 24	Change
Price	\$4.69	\$0.09	\$4.92	\$0.10
Support	\$4.52	\$0.07	\$4.76	\$0.08
Resistance	\$4.78	\$0.11	\$4.99	\$0.13
20 Day MA	\$4.52	\$0.05	\$4.75	\$0.04
50 Day MA	\$4.49	\$0.03	\$4.72	\$0.03
100 Day MA	\$4.57	-\$0.02	\$4.76	-\$0.01
4-Week High	\$4.72	\$0.04	\$4.92	\$0.06
4-Week Low	\$4.35	\$0.00	\$4.59	\$0.00
Technical Trend	Up	=	Up	=

The Crop Progress report estimated corn planted at 36% compared to 27% last week, 42% last year, and a 5-year average of 39%; and corn emerged at 12% compared to 7% last week, 10% last year, and a 5-year average of 9%. In Tennessee, corn planting was estimated at 65% compared to 49% last week, 74% last year, and a 5-year average of 64%; and corn emerged at 32% compared to 5% last week, 12% last year, and a 5-year average of 33%. September 2024 corn futures closed at \$4.80, up 11 cents since last Friday. New crop cash prices ranged from \$4.00 to \$4.70 at elevators and barge points. December 2024 corn futures closed at \$4.92, up 10 cents since last Friday. Downside price protection could be obtained by purchasing a \$5.00 December 2024 Put Option costing 40 cents establishing a \$4.60 futures floor.

Soybeans

Across Tennessee the average soybean basis weakened or remained unchanged at West, Northwest, West-Central, North-Central, and Mississippi River elevators and barge points. Basis ranged from 38 under to even the July futures contract, with an average basis at the end of the week of 20 under. Soybean net weekly sales reported by exporters were net sales of 15.8 million bushels for the 2023/24 marketing year and 0.2 million bushels for the 2024/25 marketing year. Exports for the same period were up 13% compared to last week at 11.2 million bushels. Soybean export sales and commitments were 91% of the USDA estimated total annual exports for the 2023/24 marketing year (September 1 to August 31), compared to the previous 5-year average of 97%. July 2024 soybean futures closed at \$12.19, up 4 cents since last Friday. For the week July 2024 soybean futures traded between \$12.04 and \$12.56. July 2024 soybean-to-corn price ratio was 2.60 at the end of the week. Jul/Aug and Jul/Nov future spreads were 1 and -14 cents. August 2024 soybean futures closed at \$12.20, up 4 cents since last Friday.

Crop Comments by Dr. Aaron Smith

Soybeans	Jul24	Change	Nov 24	Change
Price	\$12.19	\$0.04	\$12.05	\$0.04
Support	\$11.97	\$0.39	\$11.87	\$0.32
Resistance	\$12.33	\$0.12	\$12.18	\$0.12
20 Day MA	\$11.89	\$0.12	\$11.81	\$0.10
50 Day MA	\$11.92	\$0.08	\$11.79	\$0.09
100 Day MA	\$12.15	-\$0.07	\$11.86	-\$0.03
4-Week High	\$12.56	\$0.40	\$12.30	\$0.28
4-Week Low	\$11.45	\$0.00	\$11.46	\$0.00
Technical Trend	Up	=	Up	=

The Crop Progress report estimated soybeans planted at 25% compared to 18% last week, 30% last year, and a 5-year average of 21%; and soybeans emerged at 9% compared to 7% last year and a 5-year average of 4%. In Tennessee, soybean planting was estimated at 38% compared to 28% last week, 34% last year, and a 5-year average of 18%; and soybeans emerged at 12% compared to 6% last year and a 5-year average of 3%. New crop cash soybean prices at elevators and barge points ranged from \$11.68 to \$12.16. November 2024 soybean futures closed at \$12.05, up 4 cents since last Friday. Downside price protection could be achieved by purchasing a \$12.20 November 2024 Put Option which would cost 74 cents and set an \$11.46 futures floor. Nov/Dec soybean-to-corn price ratio was 2.45 at the end of the week.

Cotton

North Delta upland cotton spot price quotes for May 9 were 74.35 cents/lb (41-4-34) and 76.35 cents/lb (31-3-35). Adjusted World Price (AWP) decreased 0.91 cents to 59.64 cents. Cotton net weekly sales reported by exporters were 253,700 bales for the 2023/24 marketing year and 158,900 bales for the 2024/25 marketing year. Exports for the same period were up 39% compared to last week at 249,600 bales. Upland cotton export sales were 101% of the USDA estimated total annual exports for the 2023/24 marketing year (August 1 to July 31), compared to the previous 5-year average of 108%. July 2024 cotton futures closed at 77.31 cents, down 0.75 cents since last Friday. For the week July 2024 cotton futures traded between 76.51 and 80.29 cents. Jul/Dec and Jul/Mar cotton futures spreads were -2.18 cents and -0.58 cents.

Cotton	Jul24	Change	Dec 24	Change
Price	77.31	-0.75	75.13	-0.84
Support	75.58	2.07	73.68	0.62
Resistance	79.44	-1.45	77.18	-0.78
20 Day MA	79.95	-2.13	77.16	-1.29
50 Day MA	87.06	-1.82	80.83	-0.80

4-Week Low	74.93	0.00	74.02	0.00
Technical Trend	Down	=	Down	=

The Crop Progress report estimated cotton planted at 24% compared to 15% last week, 20% last year, and a 5-year average of 20%. In Tennessee, cotton planting was estimated at 16% compared to 5% last week, 12% last year, and a 5-year average of 8%. December 2024 cotton futures closed at 75.13 cents, down 0.84 cents since last Friday. Downside price protection could be obtained by purchasing a 76 cent December 2024 Put Option costing 4.85 cents establishing a 71.15 cent futures floor. March 2025 cotton futures closed at 76.73 cents, down 0.63 cents since last Friday.

Crop Comments by Dr. Aaron Smith

Wheat

Wheat net weekly sales reported by exporters were net sales of 1.5 million bushels for the 2023/24 marketing year and net sales of 14.9 million bushels for the 2024/25 marketing year. Exports for the same period were down 34% compared to last week at 12.4 million bushels. Wheat export sales were 98% of the USDA estimated total annual exports for the 2023/24 marketing year (June 1 to May 31), compared to the previous 5-year average of 105%. Wheat cash prices at elevators and barge points ranged from \$5.84 to \$6.22.

Wheat	Jul 24	Change	Sep 24	Change
Price	\$6.63	\$0.41	\$6.82	\$0.39
Support	\$6.27	\$0.38	\$6.47	\$0.36
Resistance	\$6.73	\$0.25	\$7.01	\$0.34
20 Day MA	\$6.05	\$0.18	\$6.24	\$0.19
50 Day MA	\$5.80	\$0.07	\$5.96	\$0.08
100 Day MA	\$5.95	\$0.01	\$6.08	\$0.01
4-Week High	\$6.65	\$0.32	\$6.84	\$0.32
4-Week Low	\$5.50	\$0.00	\$5.67	\$0.00
Technical Trend	Up	=	Up	=

The Crop Progress report indicated winter wheat condition at 50% good-to-excellent and 16% poor-to-very poor; winter wheat headed at 43% compared to 30% last week, 34% last year, and a 5-year average of 32%; spring wheat planted at 47% compared to 34% last week, 21% last year, and a 5-year average of 31%; and spring wheat emerged at 12% compared to 5% last week, 4% last year, and a 5-year average of 9%. In Tennessee, winter wheat condition was estimated at 79% good-to-excellent and 7% poor-to-very poor; winter wheat jointing at 96% compared to 92% last week and 96% last year; and winter wheat headed at 83% compared to 60% last week, 78% last year, and a 5-year average of 76%. July 2024 wheat futures closed at \$6.63, up 41 cents since last Friday. July wheat-to-corn price ratio was 1.41. Jul/Sep and Jul/Jul future spreads were 19 and 59 cents. July 2024 wheat futures traded between \$6.09 and \$6.65 this week. Downside price protection could be obtained by purchasing a \$6.65 July 2024 Put Option costing 39 cents establishing a \$6.26 futures floor. New crop wheat cash prices at elevators and barge points ranged from \$6.02 to \$6.34. September 2024 wheat futures closed at \$6.82, up 39 cents since last Friday. July 2025 wheat futures closed at \$7.22, up 24 cents since last Friday.
