Establishment Prorated Over Years⁹ 4

Alfalfa Assumptions

- 1. The budget is based on custom rates for machinery processes. Labor, operating, maintenance, and ownership costs are included in these rates. The baling rate includes binding.
- 2. The budget is based on no-till establishment.
- 3. Based on Roundup Ready Alfalfa.
- 4. Based on inline tube wrapping.
- 5. Lime prorated at two tons over three years.
- 6. For a more accurate fertilizer and lime recommendation, take a soil sample. (Instructions on how to take a soil sample.)
- 7. The post-emergence weed control is based on an average of three common practices. Burndown is a common practice. For weed control and/or burndown recommendations, contact the county Extension office. (County office contact information.)
- 8. Storage loss is based on an average of multiple studies.
- 9. Establishment pro-rated expenses for hay are set for four years.
