Bermuda Assumptions

1. The budget is based on custom rates for machinery processes. Labor, operating, maintenance, and ownership costs are included in these rates. The baling rate includes binding.
2. The budget is based on no-till establishment.
3. Based on inline tube wrapping.
4. Nitrogen is applied in split applications.
5. Lime prorated at one ton over three years.
6. For a more accurate fertilizer and lime recommendation, take a soil sample. ([Instructions on how to take a soil sample.](#))
7. The post-emergence weed control is based on an average of three common practices. Burndown is a common practice. For weed control and/or burndown recommendations, contact the county Extension office. ([County office contact information.](#))
8. Storage loss is based on an average of multiple studies.
9. Establishment pro-rated expenses for hay are set for 10 years.
