THE UNIVERSITY OF TENNESSEE

August 1, 2025

Number: 48:31

Trends for the Week Compared to a Week Ago

Slaughter Cows

\$1 to \$3 higher

Slaughter Bulls

\$1 to \$2 higher

Feeder Steers

Unevenly steady

Feeder Heifers

\$1 to \$3 higher

Feeder Cattle Index: 335.89

Fed Cattle

The 5-area live price on Thursday of \$242.69 up \$11.19 compared to a week ago and \$383.60 dressed with no comparison to last week.

Corn

September closed at \$3.89 a bushel, down 10 cents since last Friday.

Soybeans

September closed at \$9.69 a bushel, down 33 cents since last Friday.

Wheat

September closed at \$5.16 a bushel, down 22 cents since last Friday.

Cotton

December closed at 66.36 cents per lb, down 1.86 cents since last Friday.

Livestock Comments by Dr. Andrew P. Griffith

FED CATTLE: Fed cattle traded \$3 higher compared to last week. Prices in the South were mainly \$235 to \$236 while dressed prices were mainly \$383 to \$384.

The 5-area weighted average prices thru Thursday were \$242.69 live, \$11.19 compared to a week ago and \$383.60 dressed with no comparison to last week. A year ago, prices were \$194.68 live and \$309.71 dressed.

Cattle feeders are reminding packers who has the leverage in this market, or maybe they are reminding them who does not have the leverage. Sometimes such statements can make it sound like it is a war between packers and feedlot managers, but both parties are simply trying to make a living and get the most out of their business just like anyone else. It just so happens that packers held leverage over cattle feeders for several years and the profits rolled in for the packing sector. Now the tables have turned and cattle feeders are able to return the favor to packers by forcing them to pay higher prices. This is just like those guys with muscles in their ear lobes, this too shall pass. But, it is not going to pass anytime soon.

BEEF CUTOUT: At midday Friday, the Choice cutout was \$364.15 up \$2.83 from Thursday and down \$3.31 from a week ago. The Select cutout was \$340.60 down \$0.77 from Thursday and down \$5.01 from a week ago. The Choice Select spread was \$23.55 compared to \$21.85 a week ago.

The price freefall for wholesale beef prices slowed this week despite packers continuing to pay strong prices for finished cattle. It is probably not an enjoyable talking point for packers when the highlight is prices not declining at the same pace as they have the past few weeks, but there is hope around the corner. That hope comes

in the form of the last grilling holiday of the year on the horizon. Labor Day week-end purchases will be on the front burner the next few weeks as many consumers will look end summer with a bang. At the same time, beef production appears to be slowing. Thus, the market has been primarily driven by strong beef demand, but the supply side will begin to play a larger role in beef price support if beef production continues to decline moving through the remainder of the year. The supply side will continue garnering more attention as fewer heifers are placed in feedlots and cow slaughter continues to decline. This will bring on some of the tightest beef supplies in over a decade, which will be telling in and of itself.

OUTLOOK: Based on Tennessee weekly auction reports, steer prices were unevenly steady compared to last week while heifer prices were \$2 to \$3 higher than a week ago. Slaughter cow prices were \$1 to \$3 higher than the previous week while bull prices were \$1 to \$2 higher than a week ago. The statement concerning feeder cattle futures from last week concerning their surge through July continued through the first three days of this week, but the market wiped out the three day \$7 plus gain on Thursday before finding a little footing on Friday. Despite the market volatility, several loads of cattle were marketed in Tennessee this week through both weekly auctions and dedicated video sales. There was a clear premium for loads of all black cattle compared to loads with mixed colors. For instance, a load of 677 pound steers brought \$2,576 per head (\$380.50 per hundredweight). Without being too specific on the other loads, 725 to 790 pound steers brought \$2,550 to \$2,650 per head, 800 to 890 pound steers were valued at \$2,694 to \$2,890 per head, and 900 to 950 pound steers were valued

(Continued on page 2)

Livestock Comments by Dr. Andrew Griffith

(Continued from page 1)

from \$2,880 to \$2,937 per head. One does not want to leave out the heifers as several loads of heifers weighing between 710 and 750 were valued between \$2,298 and \$2,429 per head. The market continues to pay producers to add weight to cattle. This does not mean all is equal as adding weight to some weight classes is more lucrative than others, but adding weight has less risk than making a trade in many instances. These are certainly record prices for the region, but they are not unexpected given how cattle have been trading. The July 1, 2025 cattle inventory report was released last Friday and contained information that would continue to support feeder cattle prices. The data estimated a smaller calf crop and few signs of heifer retention and beef cow herd expansion. The January 1, 2026 cattle inventory report may indicate a slightly larger beef cow herd, but it will be a marginal increase. This supports prices for another 18 months or so.

ASK ANDREW, TN THINK TANK: A couple of weeks ago an industry professional in the state asked me to compile some information on feeder cattle receipts going through reported auction markets in Tennessee. Thus, we looked at 2023, 2024 and the first six months of 2025. In 2023, there were 315,209 head of feeder cattle that were marketed through reported auctions in Tennessee while there were 312,979 head mar-

keted in 2024. Where the information gets interesting is when only the first six months of the year are compared. There were 162,261 head of feeder cattle marketed in Tennessee reported auctions the first six months of 2023 compared to 147,335 head in 2024 over the same time period while the quantity the first six months of 2025 totaled 164,444. Given the general thought that the calf crop was smaller and there are fewer cattle, it is tough to rectify an increase in 2025 relative to the two previous years. The one thing that was not accounted for is if there was a change in the number of auctions being reported.

Please send questions and comments to agriff14@utk.edu or send a letter to Andrew P. Griffith, University of Tennessee, P.O. Box 160, 1000 Main Entrance Dr., Spring Hill, TN 37174.

FRIDAY'S FUTURES MARKET CLOSING PRICES: Friday's closing prices were as follows: Live/fed cattle –August \$230.13 +2.35; October \$223.68 +0.53; December \$224.43 +0.50; Feeder cattle –August \$334.58 +3.20; September \$333.93 +2.38; October \$331.85 +1.68; November \$328.98 +1.03; September corn closed at \$3.90 down 5 cents from Thursday.

Crop Comments by Dr. Aaron Smith

Overview

Corn, soybeans, cotton, and wheat were down for the week.

Crop conditions continue to push corn and soybean prices lower. 93% of corn and 94% of soybean production is estimated to be in fair, good, or excellent condition. For this week in the year, the U.S. crop is in fantastic condition. Unfortunately, this has pushed prices lower. December corn and November soybean futures prices closed August 1 at \$4.10 $\frac{3}{4}$ and \$9.89 $\frac{1}{4}$, down 36 $\frac{1}{4}$ cents and 85 $\frac{1}{4}$ cents since June 20th.

Acreage data and initial yield estimates will be released in August (FSA acreage data and NASS yield estimates). National yield estimates are very likely to be above the USDA trendline yields of 181 bu/acre and 52.5 bu/acre for corn and soybeans. How high the initial survey-based yield estimates are will dictate when corn and soybean futures set a low (and how low the market goes). Last year the corn market set a low on August 26 at \$3.85 before rallying to \$5.20 by mid-February and soybeans set a futures market low on December 19 at \$9.47 before increasing to \$10.79 in early February.

Cotton prices have not been able to gain any positive traction. The December futures contract has been stuck below 70 cents since December 2024. This week's tariff actions will not do cotton prices any favors as demand continues to remain elusive. The March contract consistently traded between 68 and 71 cents, however on August 1 prices broke lower, closing the week at 67.69 cents. Good conditions in the U.S. southern plains and low global demand continue to be the primary cause of low cotton prices.

Corn

Across Tennessee, average corn basis (cash price-nearby futures price) strengthened or remained unchanged at West, Northwest, North-Central, West-Central, and Mississippi River elevators and barge points. Overall, basis for the week ranged from 5

	Previous	Current	Change
USD Index	97.43	98.53	1.10
Crude Oil	65.14	67.18	2.04
DJIA	44,922	43,585	-1,337

Crop Comments by Dr. Aaron Smith

under to 28 over, with an average of 16 over the September futures at elevators and barge points. Ethanol production for the week ending July 25 was 1.096 million barrels per day, up 18,000 compared to the previous week. Ethanol stocks were 24.716 million barrels, up 0.272 million barrels compared to last week. Corn net sales reported by exporters for July 18-24 were net sales of 13.4 million bushels for the 2024/25 marketing year and 74.5 million bushels for the 2025/26 marketing year. Exports for the same period were up 41% compared to last week at 58.6 million bushels. Corn export sales and commitments were 101% of the USDA estimated total annual exports for the 2024/25 marketing year (September 1 to August 31) compared to the previous 5-year average of 102%. Cash prices ranged from \$3.84 to \$4.22 at elevators and barge points. September 2025 corn futures closed at \$3.89, down 10 cents since last Friday. For the week, September 2025 corn futures traded between \$3.87 and \$4.00. Sep/Dec and Sep/Mar future spreads were 21 and 39 cents.

Corn	Sep 25	Change	Dec 25	Change
Price	\$3.89	-\$0.10	\$4.10	-\$0.09
Support	\$3.84	-\$0.11	\$4.06	-\$0.09

20 Day MA	\$3.98	-\$0.06	\$4.17	-\$0.04
50 Day MA	\$4.13	-\$0.04	\$4.30	-\$0.03
100 Day MA	\$4.27	-\$0.02	\$4.39	-\$0.02
4-Week High	\$4.26	\$0.00	\$4.42	\$0.00
4-Week Low	\$3.87	-\$0.04	\$4.07	\$0.00
Technical Trend	Down	=	Down	=

Nationally, the Crop Progress report estimated corn condition at 73% good-to-excellent and 7% poor-to-very poor; corn silking at 76% compared to 56% last week, 75% last year, and a 5-year average of 77%; and corn dough at 26% compared to 14% last week, 28% last year, and a 5-year average of 24%. In Tennessee, corn condition was estimated at 67% good-to-excellent and 9% poor-to-very poor; corn silking at 89% compared to 85% last week, 91% last year, and a 5-year average of 92%; and corn dough at 59% compared to 43% last week, 59% last year, and a 5-year average of 56%. This week, Oct/Nov cash contracts ranged from \$3.71 to \$4.04 at elevators and barge points. December 2025 corn futures closed at \$4.10, down 9 cents since last Friday. Downside price protection could be obtained by purchasing a \$4.15 December 2025 Put Option costing 17 cents establishing a \$3.98 futures floor. March 2026 corn futures closed at \$4.28, down 8 cents since last Friday.

Soybeans

Across Tennessee average soybean basis strengthened or remained unchanged at West, Northwest, West-Central, and Mississippi River elevators and barge points and weakened at North Central elevators and barge points. Average basis ranged from 49 under to 25 over the August futures contract, with an average basis at the end of the week of 11 under. Soybean net weekly sales reported by exporters were net sales of 21.8 million bushels for the 2024/25 marketing year and 1.4 million bushels for the 2025/26 marketing year. Exports for the same period were up 39% compared to last week at 18.4 million bushels. Soybean export sales and commitments were 101% of the USDA estimated total annual exports for the 2024/25 marketing year (September 1 to August 31), compared to the previous 5-year average of 103%. Cash soybean prices at elevators and barge points ranged from \$9.16 to \$10.14. September 2025 soybean futures closed at \$9.69, down 33 cents since last Friday. For the week, August 2025 soybean futures traded between \$9.66 and \$9.99. The September soybean-to-corn price ratio was 2.59 at the end of the week. Sep/Nov and Sep/Jan future spreads were 20 and 38 cents.

Technical Trend	Down	=	Down	=

Nationally, the Crop Progress report estimated soybean condition at 70% good-to-excellent and 6% poor-to-very poor; soybeans blooming at 76% compared to 62% last week, 75% last year, and a 5-year average of 76%; and soybeans setting pods at 41% compared to 26% last week, 42% last year, and a 5-year average of 42%. In Tennessee, soybean condition was estimated at 63% good-to-excellent compared to 12% poor-to-very poor; soybeans blooming at 69% compared to 59% last week, 77% last year, and a 5-year average of 71%; and soybeans setting pods at 44% compared to 32% last week, 55% last year, and a 5-year average of 44%. Oct/Nov cash prices at elevators and barge points were \$9.39 to \$10.23 for the week. November 2025 soybean futures closed at \$9.89, down 32 cents since last Friday. Downside price protection could be achieved by purchasing a \$9.90 November 2025 Put Option which would cost 27 cents and set a \$9.63 futures floor. Nov/Dec 2025 soybean-to-corn price ratio was 2.41 at the end of the week. January 2026 soybean futures closed at \$10.07, down 31 cents since last Friday.

Cotton

North Delta upland cotton spot price quotes for July 31 were 64.36 cents/lb (41-4-34) and 66.36 cents/lb (31-3-35). Upland cotton adjusted world price (AWP) decreased 0.43 cents to 54.52 cents. Cotton net weekly sales reported by exporters were net sales of 39,100 bales for the 2024/25 marketing year and of 71,700 bales for the 2025/26 marketing year. Exports for the same period were up 25% compared to last week at 230,900 bales. Upland cotton export sales were 107% of the USDA estimated total annual exports for the 2024/25 marketing year (August 1 to July 31), compared to the previous 5-year average of 116%.

Cotton	Dec 25	Change	Mar 26	Change
Price	66.36	-1.86	67.69	-1.96

4-Week Low	66.34	-0.79	67.67	0.54
Technical Trend	Down	-	Down	-

Nationally, the Crop Progress report estimated cotton condition at 55% good-to-excellent and 14% poor-to-very poor; cotton squaring at 80% compared to 71% last week, 86% last year, and a 5-year average of 83%; and cotton setting bolls at 44% compared to 33% last week, 52% last year, and a 5-year average of 46%. In Tennessee, cotton condition was estimated at 51% good-to-excellent and 14% poor-to-very poor; cotton squaring at 72% compared to 69% last week, 93% last year, and a 5-year average of 88%; and cotton setting bolls at 45% compared to 32% last week, 62% last year, and a 5-year average of 52%. December 2025 cotton futures closed at 66.36 cents, down 1.86 cents since last Friday. For the week, December 2025 cotton futures traded between 66.34 and 68.77 cents. Dec/Mar and Dec/May cotton futures spreads were 1.33 cents and 2.5 cents. Downside price protection could be obtained by purchasing a 67 cent December 2025 Put Option costing 2.33 cents establishing a 64.67

Crop Comments by Dr. Aaron Smith

cent futures floor. March 2026 cotton futures closed at 67.69 cents, down 1.96 cents since last Friday. May 2026 cotton futures closed at 68.86 cents, down 1.85 cents since last Friday.

Wheat

Wheat net weekly sales reported by exporters were net sales of 21.8 million bushels for the 2025/26 marketing year and 1.4 million bushels for the 2026/27 marketing year. Exports for the same period were down 61% compared to last week at 10.9 million bushels. Wheat export sales were 41% of the USDA estimated total annual exports for the 2025/26 marketing year (June 1 to May 31), compared to the previous 5-year average of 39%. Nationally, the Crop Progress report estimated winter wheat harvested at 80% compared to 73% last week, 81% last year, and a 5-year average of 81%; spring wheat condition at 49% good-to-excellent and 18% poor-to-very poor; spring wheat headed at 92% compared to 87% last week, 93% last year, and a 5-year average of 95%; and spring wheat harvested at 1% compared to 1% last year and a 5-year average of 3%. Wheat cash prices at elevators and barge points ranged from \$4.74 to \$5.14.

Wheat	Sep 25	Change	Jul 26	Change
Price	\$5.16	-\$0.22	\$5.75	-\$0.20
Support	\$5.03	-\$0.25	\$5.64	-\$0.22
