

**Trends for the Week
 Compared to a Week Ago**

Slaughter Cows

steady to \$2 lower

Slaughter Bulls

steady to \$1 higher

Feeder Steers

steady to \$4 higher

Feeder Heifers

steady to \$7 higher

Feeder Cattle Index: 372.29

Fed Cattle

The 5-area live price on Thursday of \$258.32 up \$3.30 compared to a week ago and \$402.37 dressed up \$3.30 from last week.

Corn

September closed at \$4.77 a bushel, down 7 cents since last Friday.

Soybeans

September closed at \$11.85 a bushel, up 8 cents since last Friday.

Wheat

July closed at \$6.19 a bushel, down 19 cents since last Friday.

Cotton

December closed at 85.46 cents per lb, up .90 cents since last Friday.

Livestock Comments by Dr. Andrew P. Griffith

FED CATTLE: Fed cattle traded \$3 higher on a live basis compared to last week. Prices on a live basis were mainly \$257 to \$260 while prices on a dressed basis were largely \$402 to \$403.

The 5-area weighted average prices thru Thursday were \$258.32 live, up \$3.30 compared to a week ago and \$402.37 dressed, up \$3.30 from last week. A year ago, prices were \$224.49 live and \$356.07 dressed.

Cattle feeders were able to get more money out of packers again this week despite the math not adding. The math to consider is a dressed cattle price exceeding \$400 and a Choice boxed beef price less than \$390. This means packers are not adding to the bottom line but continue to take away from the bottom line. On the cattle feeding side, the math is a tight margin, but there is a possibility of a profit. Cattle feeders are buying feeder cattle (900 lb) back for \$700 to \$750 less than they are receiving for finished cattle (1,500 lb). That does not leave much room for profit when needing 600 pounds of gain. This is no game for the faint of heart, but it could result in heart problems down the road!

BEEF CUTOUT: At midday Friday, the Choice cutout was \$389.02 up \$2.08 from Thursday and down \$0.26 from a week ago. The Select cutout was \$385.17 up \$0.75 from Thursday and up \$0.21 from last week. The Choice Select spread was \$3.85 compared to negative \$2.76 a week ago.

When will buyer interest in steak cuts be evident? There is no indication from a price standpoint that buyers are bidding up Prime, Branded, or Choice grade steak cuts. One could say there was more interest in March than there is in May, which was an idea posed a couple months ago. The idea in March was that meat buyers were purchasing beef in advance with the idea of wholesale beef prices increasing leading into the summer grilling season. However, high quality beef prices are not increasing at any rate to signify a rush on the market. More specifically, there tends to be a push for steak cuts as Memorial Day weekend approaches, but the rib and loin primal values are not indicating restaurants, grocers, or food service chasing product to stock the meat counter. This may mean nothing at all since beef prices remain elevated, but it could be a cause for concern as consumers are probably spending a higher percentage of their discretionary dollar on fuel instead of food. Cattle and beef markets are not immune to outside influences, and this may be what the market is experiencing.

OUTLOOK: Based on Tennessee weekly auction market average prices, steer prices were steady to \$4 higher than last week, while heifer prices were steady to \$7 higher compared to the previous week. Slaughter cow prices were steady to \$2 lower this week compared to a week ago while slaughter bull prices were steady to \$1 higher compared to last week. Volatility is the name of the game when it comes to cattle markets, and it seems to be dominating all opponents. Local auction market trends compared to last week were mixed depending on the day of the sale for the most part. This falls in line with feeder cattle futures price movement, which was more like an unpredictable seesaw. It is clear volatility in the market place is present, and that it has many purveyors on edge. However, volatility in the market is not always a bad thing. It is only bad if someone is selling on the cash

Livestock Comments by Dr. Andrew P. Griffith

market when the market goes down and the seller has no price protection, because the alternative is volatility sending the market higher and a cattle seller benefiting from higher prices. The opposite argument would be true for a cattle buyer. Beyond the elementary illustration, volatility has always been present and will likely always be a piece of the cattle marketing puzzle unless some type of structural change takes place in the industry. Thus, cattle producers should learn how to manage and use price volatility to their advantage. For instance, the futures market offers a price for a future sell date that may or may not be realized at that future date. Producers can take advantage of a price in the future using futures, options, or LRP. However, the ability to manage volatility diminishes as one nears the anticipated marketing period. Despite volatility in cattle markets, the price of cattle is expected to remain elevated for the next two to three years due to supply and demand factors present in the market. This however does not insulate a producer from a sudden price decline or increase in prices for that matter, which is why risk management can be advantageous.

ASK ANDREW, TN THINK TANK: If all cattle prices were to decline ??? percent, would a producer be better off owning cows or stocker cattle? The CME feeder cattle index peaked December 2014 near \$245 per hundredweight and bottomed near \$120 per hundredweight in October 2016. This is a 51 percent decline in less than two years for an 800 pound steer. The CME index has been as high as \$377 per hundredweight and was at \$375 as recently as this week. It is unlikely cattle prices will decline 50 percent in a short period, but the market will decline at some point in the future if history is an indicator. A 550 pound steer in Tennessee is valued near \$2,600 per head with 900 pound steers in load lots near \$3,150 per head, which leaves \$550 of margin to put on 350 pounds on gain. If prices were to decline 10 percent during the feeding period then there would only be \$300 of margin, likely resulting in a loss. On the cow side, the value lost is in the cow or what was paid for replacement females. Thus, the dollar loss may not be realized, but the equity value is lost in the cow and the value of the next calf is reduced.

Please send questions and comments to agriff14@utk.edu or send a letter to Andrew P. Griffith, University of Tennessee, P.O. Box 160, 1000 Main Entrance Dr., Spring Hill, TN 37174.

FRIDAY'S FUTURES MARKET CLOSING PRICES: Friday's closing prices were as follows: Live/fed cattle –June \$248.90 -1.15; August \$244.10 -1.80; October \$238.30 -1.68; Feeder cattle –May \$367.38 +1.05; August \$364.23 -1.95; September \$362.23 -2.43; October \$362.23 -2.53; May corn closed at \$4.56 up 4 cents from Thursday.

Crop Comments by Dr. Charley Martinez

Overview

Corn and Wheat down for the week; Soybeans and Cotton up for the week.

This week, there were no USDA reports, but market pressures and production conditions continue shaping the season, with fuel costs up roughly \$2.00 per gallon on diesel year-over-year and continuing to elevate per-acre expenses across planting, spraying, and logistics. At the same time, global supply signals remain mixed, as strong South American production prospects compete with emerging weather variability that could still influence yields. Domestically, input cost inflation remains a concern even as some producers are reporting tighter margins compared to last year, with fertilizer, fuel, and interest costs still historically elevated. Weather patterns across major U.S. growing regions will also be a focal point, as soil moisture and temperature trends begin to set the tone for early-season crop development. I hope everyone has a great weekend!

Brazil

I wanted to provide an update on the crop conditions in Brazil. Weather in Brazil has been an important driver of global crop markets, and current patterns are worth watching closely from a U.S. producer perspective. Key production regions,

Crop Comments by Dr. Charley Martinez

particularly the Center-West (Mato Grosso) and South, have seen periods of both timely rainfall and intermittent dryness, creating a mixed outlook. Adequate moisture during key developmental stages has supported strong soybean and second-crop (safrinha) corn potential, but concerns remain about late-season dryness and heat stress, especially for corn as it moves into pollination and grain fill. In southern Brazil, more variable weather—including excessive rain at times—has raised issues with fieldwork delays and localized yield risk. For U.S. producers, this means Brazil is still positioned to produce large crops, but weather volatility introduces uncertainty that could tighten global supplies if conditions worsen. This dynamic keeps pressure on prices and export competition but also leaves room for market upside if Brazilian production underperforms expectations.

Fuel

The table below shows that current diesel prices are at \$5.66 per gallon, up sharply from \$3.54 a year ago. Even short-term increases from last week and last month indicate a steady upward trend, which raises concerns heading into peak planting and spraying. Gasoline prices (regular at \$4.55 and premium at \$5.41) also affect input transport, labor travel, and custom operations. While E85 remains the lowest-cost option, it is less relevant for most heavy equipment. Overall, rising fuel prices directly increase per-acre production costs, tighten operating margins, and make cost management and fuel efficiency more critical.

	Regular	Mid-Grade	Premium	Diesel	E85		Previous	Current	Change
Current Avg.	\$4.55	\$5.04	\$5.41	\$5.66	\$3.67				
Yesterday Avg.	\$4.56	\$5.04	\$5.42	\$5.67	\$3.68				
Week Ago Avg.	\$4.39	\$4.87	\$5.24	\$5.57	\$3.45	USD Index	98.19	97.85	-0.34

Year Ago Avg.	\$3.15	\$3.64	\$3.99	\$3.54	\$2.57	DJIA	49594	49609	15

Corn

Across Tennessee, average corn basis (cash price-nearby futures price) strengthened from last week at West, Northwest, West-Central, North-Central, and Mississippi River elevators and barge points. Overall, basis for the week ranged from 9 cents under to 42 cents over, with an average of 19 cents over with the May futures at elevators and barge points. Ethanol production for the week ending May 1st was 1.017 million barrels, up 8,000 barrels compared to the previous week. Ethanol stocks were 26.02 million barrels, up 139,000 barrels compared to the previous week. Cash prices ranged from \$4.43 to \$5.20 at elevators and barge points. On Friday, September 2026 corn futures closed at \$4.77, which is down 7 cents compared to last week. For the week, September 2026 corn futures traded between \$4.68 and \$4.92.

Corn	Sep 26	Change	Dec 26	Change
Price	\$4.77	-\$0.07	\$4.93	-\$0.06
Support	\$4.73	-\$0.06	\$4.97	\$0.04
Resistance	\$4.80	-\$0.08	\$4.89	-\$0.13
20 Day MA	\$4.72	\$0.05	\$4.87	\$0.05
50 Day MA	\$4.70	\$0.03	\$4.84	\$0.03
100 Day MA	\$4.58	\$0.02	\$4.71	\$0.01
4-Week High	\$4.92	\$0.04	\$5.06	\$0.04
4-Week Low	\$4.53	-\$0.01	\$4.69	\$0.00
Technical Trend	DOWN	=	DOWN	=

Nationally, the Crop Progress report estimated corn emerged to be 13% compared to 7% last week, 10% year, and a 5-year average of 9%; corn planted to be 38% compared to 25% last week, 38% last year, and a 5-year average of 34%. In Tennessee, the Crop Progress report estimated corn emerged to be 62% compared to 46% last week, 28% last year, and a 5-year average of 28%; corn planted to be 87% compared to 80% last week, 58% last year, and a 5-year average of 60%. This week new crop cash contracts ranged from \$4.53 to \$5.11 at elevators and barge points. For the week of April 24-30, 2026, there were net sales of 1,361,700 MT for 2025/2026 were down 15 percent from the previous week and 4% from

Crop Comments by Dr. Charley Martinez

the prior 4-week average. Net sales of 122,800 MT for 2026/2027 were reported for unknown destinations (70,000 MT), Mexico (49,600 MT), and Honduras (3,200 MT). Exports of 2,056,600 MT were up 28% from the previous week and 18% from the prior 4-week average. December corn futures closed at \$4.93, down 6 cents from last week.

Soybeans

Across Tennessee average soybean basis weakened compared to last week at West, Northwest, North-Central, West-Central, and Mississippi River elevators and barge points. Average basis ranged from 25 under to 32 over the May futures contract, with an average basis at the end of the week of 6 cents over. Cash soybean prices at elevators and barge points ranged from \$11.52 to \$12.56. September 2026 soybean futures closed at \$11.85, up 8 cents compared to last week. For the week, September 2026 soybean futures traded between \$11.57 and \$11.95.

Soybeans	Sep 26	Change	Nov 26	Change
Price	\$11.85	\$0.08	\$11.89	\$0.06
Support	\$11.72	\$0.04	\$11.77	\$0.03

Technical Trend	UP	=	UP	=

Nationally, the Crop Progress report estimated soybean emerged to be 13% compared to 8% last week, 6% last year, and a 5-year average of 5%; soybean planted to be 33% compared to 23% last week, 28% last year, and a 5-year average of 23%. In Tennessee, the Crop Progress report estimated soybeans emerged to be 42% compared to 29% last week, 8% last year, and a 5-year average of 4; soybean planted to be 69% compared to 62% last week, 34% last year, and a 5-year average of 25%. For the week of April 24-30, 2026, there were net sales of 141,900 MT for 2025/2026 (a marketing-year low) were down 45% from the previous week and 51% from the prior 4-week average. Total net sales of 5,500 MT for 2026/2027 were for Indonesia. Exports of 530,800 MT were down 13% from the previous week and 25% from the prior 4-week average. The destinations were primarily to China (200,900 MT), Mexico (91,700 MT), Japan (70,300 MT), Indonesia (40,300 MT), and Saudi Arabia (30,900 MT). November 2026 soybean futures closed at \$11.89, up 6 cents compared to last week.

Cotton

North Delta upland cotton spot price quotes for May 7th were up compared to last week. Prices were 80.0 cents/lb (41-4-34), and 84.75 cents/lb (31-3-35), which made both up .80 cents compared to last week's prices.

Cotton	May 26	Change	Dec 26	Change
Price	81.71	-0.14	85.46	0.90
Support	81.71	-0.14	83.88	0.64
