

**Trends for the Week  
Compared to a Week Ago**

**Slaughter Cows**

unevenly steady

**Slaughter Bulls**

\$1 to \$4 higher

**Feeder Steers**

\$3 to \$10 lower

**Feeder Heifers**

steady to \$6 higher

**Feeder Cattle Index:** 364.02

**Fed Cattle**

The 5-area weighted average prices through Wednesday were no reportable trade live and \$405.60 dressed, no change from last week. A year ago, prices were \$236.32 live and \$376.65 dressed.

**Corn**

September closed at \$4.25 a bushel, up 5 cents since last Friday.

**Soybeans**

September closed at \$11.28 a bushel, up 11 cent since last Friday.

**Wheat**

July closed at \$6.06 a bushel, up 26 cents since last Friday.

**Cotton**

December closed at 79.67 cents per lb, up 3.25 cents since last Friday.

**Livestock Comments by Dr. Andrew P. Griffith**

**FED CATTLE:** Fed cattle trade was not established. Asking prices on a live basis were \$260 while bid prices on a live basis were mainly \$253 to \$254.

The 5-area weighted average prices through Wednesday were no reportable trade live and \$405.60 dressed, no change from last week. A year ago, prices were \$236.32 live and \$376.65 dressed.

With no trade occurring through the first four weekdays, it is difficult to provide much competent analysis on the finished cattle market. The only thing that one may could say is that cattle feeding margins are looking thin with feeder cattle and live cattle prices where they are. The June live cattle futures market price increased nearly \$6 per hundredweight this week, which would be nearing \$100 per head increase in value. This does not mean live cattle will trade \$6 higher than last week's cash trade, but one would venture a guess that cash live cattle prices will increase compared to a week ago when trade does take place. The guess is most cash trade will occur Friday as packers and feedlot managers try to agree on a price.

**BEEF CUTOUT:** At midday Thursday, the Choice cutout was \$393.27 down \$1.23 from Wednesday and up \$0.16 from a week ago. The Select cutout was \$374.98 down \$2.28 from Wednesday and up \$1.00 from last week. The Choice Select spread was \$18.29 compared to \$19.13 a week ago.

The story on boxed beef prices this week is a rerun of the story from last week and the week before and so on. Consumers continue to support boxed beef prices at the current level, but the packer is unable to push prices higher as the consumer has clearly said there is enough beef at this price. This does not mean demand is soft or weak. What it means is the consumer has stated their demand and this is the price they are willing to pay. This is valuable information for beef industry participants during the summer grilling season when demand tend to be at its apex. The continuation of strong import of beef is also valuable information as consumers do not appear to have slowed ground beef consumption. The versatility of ground beef as hamburger, meatloaf, taco meat, chili, and several other entrees is what keeps it moving. Consumers tend to like the price point and the fact it can be used for several different meals compared to other beef items. This does not mean they will not purchase steak, but ground beef is less expensive and offers various eating experiences.

**OUTLOOK:** Based on Tennessee weekly auction market average prices, steer prices were \$3 to \$10 lower compared to last week, while heifer prices were steady to \$6 higher compared to the previous week. Slaughter cow prices were unevenly steady this week compared to a week ago while slaughter bull prices were \$1 to \$4 higher compared to last week. Over the past two weeks, August feeder cattle futures have recaptured \$25 to \$26 per hundredweight of the losses experienced in May and the first couple of days of June. Cash feeder cattle prices did decline during this time as well, and the decline in cash was not a matter of fundamentals but simply following futures traders to lower price levels. This type of price action can be detrimental to operations selling cattle when the market is stressed as it has been the past several weeks. Alternatively, selling cattle in the market today can be advantageous as cash prices have been supported with the recent rebound in

## Livestock Comments by Dr. Andrew P. Griffith

feeder cattle futures. It is difficult to predict what will happen next, but what is more difficult is predicting when it will happen. For instance, the probability is high that feeder cattle futures will decline once again. This may or may not happen between now and the end of summer, but the chances of the market staying at elevated levels throughout the next 12 months is unlikely. Thus, there is a good chance prices will decline once again. When that will be is not known at this time, but when it does happen, it can occur abruptly. This is the reason price risk management is encouraged. The hope is price risk management is a production cost, but it could come in handy when the market softens for a few weeks or months. Speaking directly to the cash market, the yearling cattle market and the video sale market will be hot the next couple of months. There should be a large quantity of yearling type cattle marketed the next eight weeks as well as lighter weight cattle marketed for fall delivery that will demonstrate the state of the cattle market. This will be interesting information to consume.

The June cattle on feed report for feedlots with a 1000 head or more capacity indicated cattle and calves on feed as of June 1, 2026 totaled 11.68 million head, up 2.1% compared to a year ago, with the pre-report estimate average expecting an increase of 2.5%. May placements in feedlots totaled 1.70 million head, down 9.7% from a year ago with the pre-report estimate average expecting placements down 6.0%. May marketing's totaled 1.55 million head down 11.8% from 2025 with pre-report estimates expecting marketings down 10.8%. Placements on feed by weight: under 700 pounds down 8.2%, 700 to 899 pounds down 12.7%, 900 pounds and over down 3.2%.

**ASK ANDREW, TN THINK TANK:** What is the cost of feeding hay with inadequate quality? This question stems from several hay fields being cut late due to frequent rain events. The answer depends on what class of cattle the hay is being fed to and if any supplement is being added. Dry cows do not have as high a nutrient need as lactating cows. Thus, fall calving herds need higher quality hay than spring calving herds. Knowing the exact cost of failing to supplement inferior hay is difficult as the cost will depend on just how poor the nutritive quality is. Regardless, poor quality hay can result in calves weaning at lighter weights and a lower pregnancy rate when rebreeding cows during the winter months. Poor quality hay for spring calving herds generally shows up in late winter when cows begin calving. The impacts may be less evident depending on when spring grazing can begin. Feeding poor quality hay to weaned calves results in lower average daily gain if it is the primary feedstuff, but low nutrient hay is not as big of a deal if its primary purpose is providing roughage for high nutrient rations.

**FRIDAY'S FUTURES MARKET CLOSING PRICES:** Friday's closing prices were as follows: Live/fed cattle –June \$254.80 -0.93; August \$246.63 -2.23; October \$239.98 -1.88; Feeder cattle –August \$366.60 -0.83; September \$364.68 -0.98 October \$361.75 -1.10; November \$358.55 -1.08; July corn closed at \$4.18 down 4 cents from Thursday.

## Crop Comments by Dr. Charley Martinez

### Overview

Wheat up for the week; Corn, Soybeans, and Cotton down for the week

In this week's crop comments, producers can expect a mixed outlook shaped by ample grain supplies, shifting market signals, and still-elevated input costs. Globally, corn production is projected higher into 2026/27, pointing to continued pressure on prices, while U.S. crop conditions remain generally favorable with 68% of corn and 66% of soybeans rated good-to-excellent. Locally, Tennessee conditions are slightly weaker, with corn at 66% good-to-excellent and soybeans at 58%, highlighting emerging regional variability. Cash markets reflected softer tone, with corn prices ranging from \$3.89 to \$4.46 and soybean prices from \$10.79 to \$11.53, alongside weakening basis levels. At the same time, wheat supplies are tightening significantly, with U.S. production forecast near 1.54 billion bushels, one of the lowest levels in decades, though global competition continues to limit major price rallies. Fuel costs have eased from recent highs, with diesel averaging \$4.76 per gallon, down from \$5.17 last month but still well above last year's \$3.31. Overall, this week's update emphasizes strong production potential, softer grain price pressure, and continued margin challenges, reinforcing the need for

## Crop Comments by Dr. Charley Martinez

disciplined marketing and cost management strategies. Hope everyone has a great weekend!

### Feed Outlook: June 2026

The USDA ERS Feed Outlook: June 2026 report highlights the supply outlook for feed grains, driven largely by increased global corn production. Global coarse grain production is projected higher for both the 2025/26 and 2026/27 marketing years, with corn accounting for the majority of the increase due to expanded acreage and improved yields in key exporting countries such as Brazil, Argentina, and India. This suggests continued ample feed grain availability, which can put downward pressure on corn prices.

On the domestic side, U.S. corn planting for the 2026/27 crop is nearly complete and slightly ahead of historical averages, with strong early-season crop progress reported across most major producing states. While early vegetative-stage conditions generally limit yield risks, future weather during reproductive stages will be critical in determining final production levels. Overall, the outlook points to solid production potential and relatively ample supply, which may contribute to tighter margins if prices weaken, reinforcing the importance of marketing strategies and cost control for producers.

### Wheat Outlook: June 2026

The USDA ERS Wheat Outlook: June 2026 indicates a significantly tighter U.S. wheat supply situation heading into the 2026/27 marketing year, largely driven by drought-reduced production. U.S. all-wheat production is forecast at about 1.54 billion bushels, one of the lowest levels in decades, with winter wheat output down sharply year over year. For producers, this underscores the ongoing impact of weather risk and reduced wheat acreage on overall grain supply.

Despite tighter domestic supplies, U.S. wheat exports remain constrained and are forecast among the lowest levels in over 50 years, as higher U.S. prices limit competitiveness in global markets. At the same time, global wheat production is comparatively stronger, with competing exporters maintaining ample supplies, which moderates price upside. For producers, this combination of smaller U.S. crops but competitive global markets suggests a mixed outlook: local supply tightness may support prices, but global competition could limit sustained rallies, making disciplined marketing strategies important.

### Fuel

Fuel prices across Tennessee have softened modestly in recent days but higher than year-ago levels, maintaining the cost pressure for row crop producers. Current averages show regular gasoline at \$3.59 per gallon, mid-grade at \$4.08, premium at \$4.47, and diesel at \$4.76. These prices are down slightly from both yesterday and last week, with diesel declining from \$4.78 yesterday and \$4.89 a week ago, signaling a short-term easing trend. Compared to a month ago, however, fuel costs have dropped more substantially, with diesel down from \$5.17 per gallon, which may offer some seasonal relief in operating expenses. Despite this recent decline, prices remain significantly above year-ago levels, particularly for diesel, which has increased from \$3.31 per gallon. Overall, while the downward movement in fuel prices is a positive sign for producers as we continue managing through tight margins.

	Regular	Mid-Grade	Premium	Diesel			
Current Avg.	\$3.59	\$4.08	\$4.47	\$4.76			
Yesterday Avg.	\$3.60	\$4.09	\$4.49	\$4.78		Previous	Current

### Corn

Across Tennessee, average corn basis (cash price-nearby futures price) weakened from last week at West, Northwest, West-Central, North-Central, and Mississippi River elevators and barge points. Overall, basis for the week ranged from 25

## Crop Comments by Dr. Charley Martinez

cents under to 11 cents over, with an average of 3 cents under with the July futures at elevators and barge points. Ethanol production for the week ending June 12th was 1.102 million barrels, down 6,000 barrels compared to the previous week. Ethanol stocks were 24.474 million barrels, up 22,000 barrels compared to the previous week. Cash prices ranged from \$3.89 to \$4.46 at elevators and barge points. On Friday, September 2026 corn futures closed at \$4.25, which is up 5 cents compared to last week. For the week, September 2026 corn futures traded between \$4.14 and \$4.30.

Corn	Sep 26	Change	Dec 26	Change
Price	\$4.25	\$0.05	\$4.44	\$0.04
Support	\$4.22	\$0.06	\$4.40	\$0.04
Resistance	\$4.29	\$0.04	\$4.48	\$0.04
20 Day MA	\$4.40	-\$0.10	\$4.59	-\$0.09
50 Day MA	\$4.60	-\$0.02	\$4.76	-\$0.03
100 Day MA	\$4.60	\$0.00	\$4.74	-\$0.01
4-Week High	\$4.86	-\$0.05	\$5.00	-\$0.06
4-Week Low	\$4.14	-\$0.02	\$4.34	-\$0.01
Technical Trend	UP	=	UP	=

Nationally, the Crop Progress report estimated corn condition at 68% good-to-excellent (up 1% from last week) and 6% poor-to-very poor (unchanged from last week); corn emerged to be 94% compared to 86% last week, 93% last year, and a 5-year average of 93%. In Tennessee, corn condition was estimated at 66% good-to-excellent (down 3% from last week) and 7% poor-to-very poor (down 1% from last week); corn emerged to be 99% compared to 95% last week, 91% last year, and a 5-year average of 96%. This week new crop cash contracts ranged from \$3.94 to \$4.49 at elevators and barge points. For the week of June 5-11, 2026, net sales of 1,157,100 MT for 2025/2026 were up 16% from the previous week, but down 8% from the prior 4-week average. Net sales of 519,000 MT for 2026/2027 primarily for Japan (211,000 MT), South Korea (201,000 MT), Mexico (142,700 MT), unknown destinations (43,500 MT), and Honduras (30,500 MT), were offset by reductions for Colombia (162,500 MT). Exports of 1,815,600 MT were down 5% from the previous week, but up 8% from the prior 4-week average. December corn futures closed at \$4.44, up 4 cents from last week.

### Soybeans

Across Tennessee average soybean basis weakened compared to last week at West, Northwest, North-Central, West-Central, and Mississippi River elevators and barge points. Average basis ranged from 25 under to 11 over the July futures contract, with an average basis of 3.5 under at the end of the week. Cash soybean prices at elevators and barge points ranged from \$10.79 to \$11.53. September 2026 soybean futures closed at \$11.28, up 11 cents compared to last week. For the week, September 2026 soybean futures traded between \$11.07 and \$11.44.

Soybeans	Sep 26	Change	Nov 26	Change
Price	\$11.28	\$0.11	\$11.42	\$0.10
Support	\$11.22	\$0.09	\$11.36	\$0.09
Resistance	\$11.37	\$0.15	\$11.51	\$0.14
20 Day MA	\$11.47	-\$0.11	\$11.59	-\$0.10
50 Day MA	\$11.60	-\$0.02	\$11.67	-\$0.01
100 Day MA	\$11.44	\$0.02	\$11.47	\$0.02
4-Week High	\$12.01	-\$0.08	\$12.07	-\$0.07
4-Week Low	\$11.07	-\$0.06	\$11.22	-\$0.04
Technical Trend	UP	=	UP	=

Nationally, the Crop Progress report estimated soybean condition at 66% good-to-excellent (up 1% from last week) and 6% poor-to-very poor (unchanged from last week); soybean emerged to be 88% compared to 79% last week, 83% last year, and a 5-year average of 82%; soybean planted to be 95% compared to 92% last week, 93% last year, and a 5-year average

## Crop Comments by Dr. Charley Martinez

of 93%. In Tennessee, soybean condition was estimated at 58% good-to-excellent (down 5% from last week) compared to 8% poor-to-very poor (unchanged from last week); emerged to be 86% compared to 83% last week, 65% last year, and a 5-year average of 69%; soybean planted to be 94% compared to 90% last week, 77% last year, and a 5-year average of 80%. For the week of June 5-11, 2026, there were net sales of 424,900 MT for 2025/2026 were up noticeably from the previous week and up 49% from the prior 4-week average. Net sales of 304,100 MT for 2026/2027 primarily for unknown destinations (264,000 MT), Mexico (24,000 MT), Malaysia (10,000 MT), Indonesia (8,500 MT), and South Korea (600 MT), were offset by reductions for Thailand (3,000 MT) and Japan (500 MT). Exports of 552,400 MT were up 34% from the previous week and 6% from the prior 4-week average. The destinations were primarily to Egypt (218,300 MT), China (136,300 MT), Indonesia (73,900 MT), Mexico (65,000 MT), and Malaysia (12,400 MT). November 2026 soybean futures closed at \$11.42, up 10 cents compared to last week.

### Cotton

North Delta upland cotton spot price quotes for June 17th were noticeably down compared to last week. Prices were 75.17 cents/lb (41-4-34), and 79.92 cents/lb (31-3-35), which made both up 7.07 cents compared to last week's prices.

Cotton	Dec 26	Change	Mar 27	Change
Price	79.67	3.25	81.05	3.41
Support	79.04	2.99	80.41	3.13
Resistance	80.07	3.19	81.42	3.33
20 Day MA	78.44	-0.90	79.62	-0.78
50 Day MA	80.58	0.25	81.50	0.28
100 Day MA	75.52	0.39	76.45	0.41
4-Week High	84.10	-3.98	84.64	-3.96
4-Week Low	75.17	0.00	76.43	0.00
Technical Trend	UP	=	UP	=

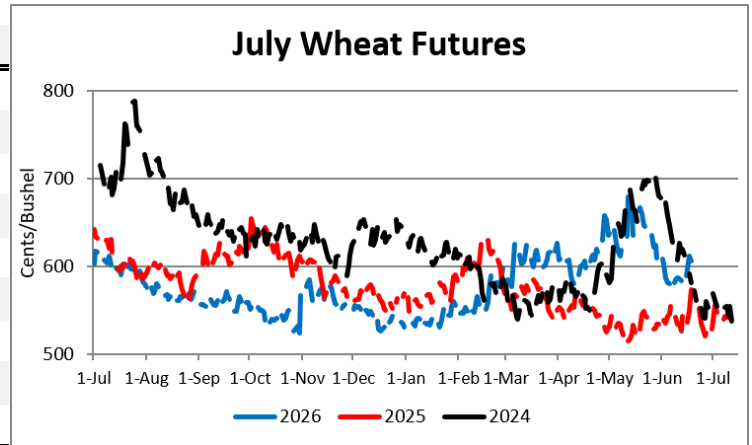

Nationally, the Crop Progress report estimated cotton squaring to be 19% compared to 13% last week, 18% last year, and a 5-year average of 17%; cotton planted to be 86% compared to 77% last week, 84% last year, and a 5-year average of 88%. In Tennessee, the Crop Progress report estimated cotton squaring to be 21% compared to 16% last week, 10% last year, and a 5-year average of 17%; cotton planted to be 99% compared to 97% last week, 87% last year, and a 5-year average of 95%. For the week June 5-11, 2026, there was a total net sales of Upland totaling 177,100 RB for 2025/2026 were down 15% from the previous week, but up 5% from the prior 4-week average. Net sales of 188,400 RB for 2026/2027 were primarily for Vietnam (65,600 RB), Pakistan (39,600 RB), Indonesia (22,500 RB), Malaysia (21,100 RB), and Nicaragua (15,000 RB). Exports of 251,000 RB were down 16% from the previous week and 15% from the prior 4-week average. The destinations were primarily to Vietnam (66,300 RB), Pakistan (33,100 RB), Turkey (28,000 RB), Bangladesh (24,500 RB), and China (19,800 RB). For the week, December 2026 cotton futures closed at 79.67 cents, up 3.25 cents compared to last week. March 2027 cotton futures closed at 81.05 cents, up 3.41 cents compared to last week.

### Wheat

Wheat cash prices at elevators and barge points ranged from \$5.39 to \$6.16.

## Crop Comments by Dr. Charley Martinez

Wheat	Jul 26	Change	Sep 26	Change
Price	\$6.06	\$0.26	\$6.06	\$0.10
Support	\$5.98	\$0.22	\$5.89	\$0.00
Resistance	\$6.15	\$0.30	\$6.15	\$0.12
20 Day MA	\$6.03	-\$0.29	\$6.04	-\$0.23
50 Day MA	\$6.18	-\$0.04	\$6.18	-\$0.13
100 Day MA	\$6.02	\$0.05	\$6.02	-\$0.11
